

Java Installation Process

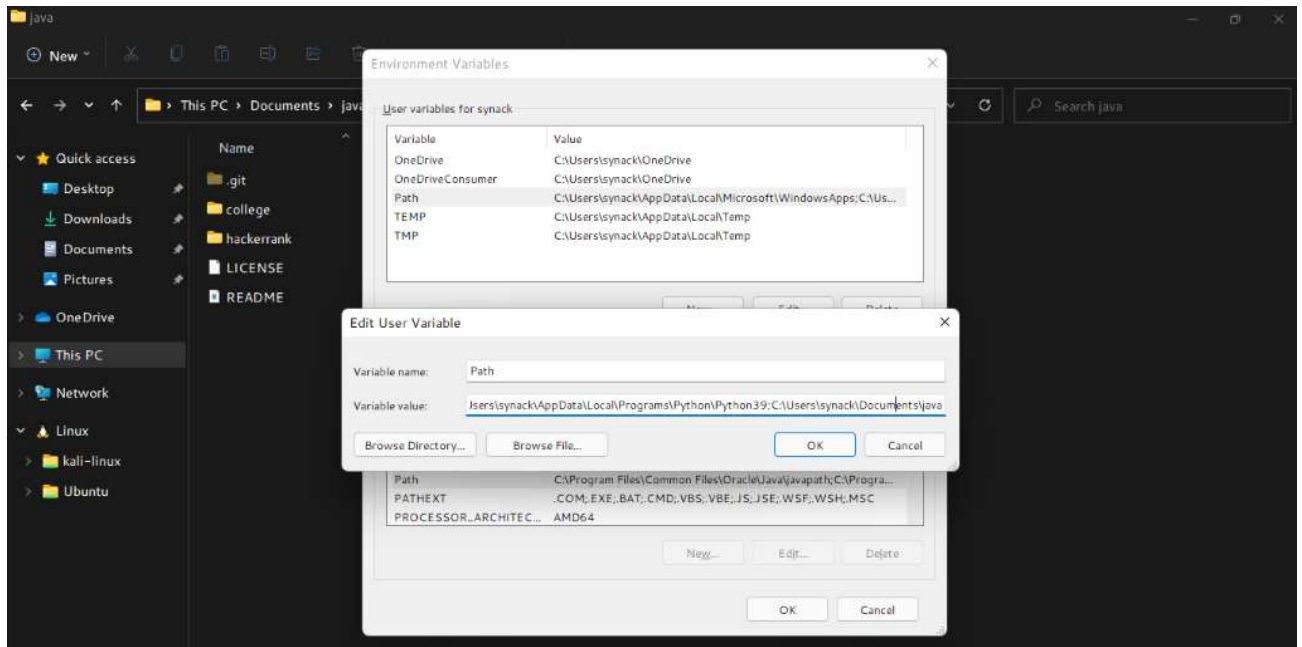

1. Download the jdk-16.0.2_windows-x64_bin.exe setup file from official website

2. Install it (Also note the PATH for Installation)

3. Edit Environment Variables and add the PATH where you're going to do Java Programs, in my case it is
C:\Users\synack\Documents\java

4. Try running a program to check whether it works or not.
